## FREE SKIN CANCER SCREENING TO BE HELD AT BUMC

Physicians in the Dermatology Section of the Evans Medical Group of University Hospital are offering free skin cancer screening sessions Wednesday, May 28, and Thursday, May 29, for interested individuals and employees of the Medical Center, Boston City Hospital and other area institutions. Clinics will be held both days from 3 to 6:30 p.m. in the Doctors Office Building, Suite 402. The screening is being held in observance of National Skin Cancer Detection and Prevention Week, May 26 through June 1.

Dermatologists will provide free skin evaluations for those who are concerned about possible skin cancer, and they will provide educational materials and answer questions about skin cancer detection and prevention. Patients with suspicious lesions will be referred to their own physicians for follow-up.

Anyone wishing to be screened should call x7420 (638-7420) for an appointment. This effort is co-sponsored by the American Cancer Society and the American Academy of Dermatology.
